EXECUTIVE SUMMARY

Budget Variance

All three service boards continue to perform favorably against budget thru August. Although Pace revenue remains slightly under budget, this shortfall is more than offset by lower than budgeted expenses.

Each service board has now incorporated the revenue adjustment adopted by the RTA into their budgets. However, due to inconsistency in the individual treatment of these adjustments, the year-to-date variance in the public funding requirements of the service boards may be misleading as reported. Therefore, we have considered these inconsistencies in the analysis of positive budget variance (see Figure I-B) in order to show the year-to-date variances of the service boards on an equivalent basis.

Ridership Results

On a systemwide basis, ridership declined by 9% in August compared to 1985. Pace reported the largest loss of 11%, while CTA and Metra fell 9.3% and 4.3% respectively. The overall trend of declining ridership since the fare increase in February was exacerbated by one less weekday in August, 1986 compared to last year.

For the year-to-date systemwide ridership is 4.7% behind 1985.

Performance Indicators

Financial performance was generally improved thru the first eight months. Both CTA and Pace recovery ratios were significantly better (7% and 9% respectively), while Metra remained flat. Operating expense per mile showed moderate increases or declined, though expense per passenger was up due to ridership losses.

Financial Position

The RTA's financial position remains very strong despite the maturity of the 1985 Series Working Cash Notes. In part, this is due to the issuance of the 1986 Working Cash Notes, but also reflects RTA's generally sound financial position.

Thru July, actual sales tax receipts are about .7% (or \$1.3 million) ahead of budgeted levels.

SECTION I
BUDGET VARIANCE

Chicago Transit Authority

Current Month

CTA's revenue was \$805,000 or 3.1% over budget and operating expenses were \$465,000 or 0.9% under budget in August. Public funding requirement was \$1.5 million or 6.0% less than budget. CTA's actual recovery ratio of 53.07% exceeded the budgeted ratio of 51.00%.

Passenger revenues were favorable by 2.1% due to greater than budgeted revenues from the fare increase and increased transfer restrictions. Although revenues from the farebox have not met expectations, the significant increase in the sale of monthly passes has more than offset this. All other revenues in the aggregate were favorable by 27.5%. This is due primarily to unbudgeted link-up pass revenue and favorable advertising revenues.

Operating expenses were favorable by 0.9% in August attributable to favorable variances in Fuel, Materials and All Other Expenses of 34.7%, 18.3% and 9.9% respectively. The average fuel price was 36.2¢ per gallon which was favorable to budget by 30.3¢ per gallon. Also, part of the favorable fuel variance was due to lower fuel consumption. The favorable variance in All Other Expenses is primarily attributable to the very slow implementation of the security program, decreased bank counting charges due to improved dollar bill quality from the new fareboxes and less than anticipated inflation.

Partially offsetting these favorable results were unfavorable variances in Labor of 3.3% and Electric Power of 2.5%. The unfavorable labor variance was the result of actual hours in excess of budget due primarily to the implementation of Phase I of Operation BUS. Pay increases retroactive to last December for the craft union employees also contributed to higher labor cost for the month. The Electric Power variance is attributable to higher consumption in August due to greater than expected air-conditioning needs on the rail system.

Year-To-Date

Total Revenue through eight months was favorable by 1.6% due to greater than budgeted passenger revenues. Operating expenses were favorable by 3.4%. Labor, Fuel, Materials, and All Other Expenses had favorable variances of 1.4%, 31.5%, 6.1%, and 11.1% respectively. A significant portion of the favorable variance in operating expenses is due to a lower than budgeted labor rate. The average loaded rate through eight months was \$19.44/hour or 47¢/hour favorable. The lower rate is primarily due to less than anticipated costs from the Fair Labor Standards Act and the effects of part-time drivers.

The positive performance to budget through eight months has resulted in a favorable variance in CTA's deficit of \$20.6 million or 10.0% through August. The actual recovery ratio of 52.93% compared favorably to the budgeted ratio of 50.03%. However, it should be noted that the current favorable variance in CTA's deficit should closely approximate their eventual year-end deficit. In their amended 1986 budget to reflect revised sales tax revenues, CTA opted to reduce their budgeted expenses in only the last quarter of this year.

CTA PERCENTAGE VARIANCE
ACTUAL VS. BUDGET
THRU AUGUST 1986

FIGURE I-A

CTA ANALYSIS OF POSITIVE BUDGET VARIANCE THRU AUGUST 1986

Analysis of CTA Revenue Variance

FIGURE I-C

Commuter Rail Division

Current Month

August revenue was \$434,000 or 3.8% better than budget while expenses exceeded the budget by \$292,000 or 1.4%. Public Funding requirement was \$310,000 or 3.2% lower than budget. The actual recovery ratio of 56.21% exceeded the budget ratio by 1.32 points.

For the month of August, all carriers reported favorable passenger revenue variances. With the exception of CSS and ICG, all carriers also reported favorable operating expense variances which amounted to \$2.6 million. However, Metra recorded a claims reserve of \$3.0 million in this month for BN (\$1.2 million), ICG (\$1.3 million), CNW (\$.1 million) and NIRC (\$.4 million). The unfavorable variance of \$3.0 million created by this claims reserve more than offset the carriers favorable operating expense variance and resulted in a net unfavorable operating expense variance of \$.3 million.

Year-To-Date

Passenger revenues were slightly over budget. The favorable other revenue variance of \$1.1 million was primarily attributable to NIRC's higher investment income and grant projects credits.

For eight months period, all carriers but CSS reported a favorable operating expense variance of \$12.6 million. However, within this period Metra recorded a claims reserve of \$6.5 million for all carriers except CSS. In Metra's 1986 budget, only CNW had a claims expense budget of \$400,000 for 1986. There were no claims provisions set up by Metra for other carriers. The procedures for establishing claims reserves and the level of such reserves at each of the Service Boards are being studied as part of the 1987 budget process.

The unfavorable variance created by this claims reserve coupled with the unfavorable insurance expense variance of \$1.0 million greatly offset the favorable carriers operating expense variance and reduced this favorable expense variance down to \$5.1 million.

The favorable revenue variance of \$1.4 million, the favorable expense variance of \$5.1 million and the unexpended capital cost of \$1.0 million resulted in lower funding requirement of \$7.6 million or 9.2%. Recovery ratio of 55.40% was favorable to the budgeted ratio of 52.94%.

Analysis of Metra Revenue Variance

FIGURE I-F

Suburban Bus Division

Current Month

Pace's operating revenue was \$51,000 or 2.9% less than budget and operating expense was \$1,095,000 or 19.1% under budget in August. Public funding requirement was \$1,042,000 or 25.9% less than budget. Pace's actual recovery ratio of 35.93% was 19.9% above the budgeted recovery ratio of 29.96%.

Passenger revenues were unfavorable by 8.4% due to lower than projected ridership levels. However, this was somewhat offset by an almost 200% increase in investment and miscellaneous income due to receipt of UWP funds during August.

Operating expenses were favorable by 19.1% in August. The favorable variances are attributable to Funded Carriers, 17.3%; Contract Carriers, 5.4%; Centralized Support, 8.3%; Fuel, 50.0%; Administration, 36.4%; Paratransit, 20.5% and New Service, 100%. Administrative expense was very favorable to budget as a result of the capital grant cost allocation program becoming fully implemented during August.

Year-To-Date

Total Revenue was unfavorable by \$590,000 or 4.4% due to lower than expected revenue from the fare increase. Total expenses were favorable by \$5.3 million or 11.7% which more than offset the shortfall in revenues.

The favorable operating expenses have resulted in a favorable variance in Pace's deficit of \$4.6 million or 14.4% through August. The actual recovery ratio of 31.97% was favorable by 8.3% to the budgeted ratio of 29.53%.

SECTION II
RIDERSHIP RESULTS

RIDERSHIP

August, 1986 and Year-To-Date Results

Ridership results for the month of August were down markedly from last year. However, in part the decline in ridership reported by all three service divisions was due to one less workday in August, 1986, compared to August, 1985. Pace reported a drop of 11%, followed by CTA and Metra with drops of 9.3% and 4.3% respectively. But average weekday ridership actually increased 1.7% for Metra though CTA and Pace declined by 9% and 8.6%.

For the year-to-date, RTA systemwide ridership was down 4.7% thru August. Among the service divisions, the CTA reported a decline of 5.2%, while Pace dropped 5.0%. Metra remained slightly ahead for the year-to-date with a 0.3% increase.

Table II-A and Figure II-A summarize RTA and service board results for the month of August.

Individual Carrier Results

The impact of the one less workday affected both the rapid and bus mode for CTA with bus experiencing a larger relative drop of 9.7% compared to 8.3% for rail. This reversed recent experience which has seen larger declines on rail since the fare increased to \$1.00. On a moving annual basis, CTA is now 2.9% below the previous twelve months.

For the month, Metra was led by the Joliet Line with a 3.5% increase followed by Rock Island's 3.1% increase. However, all other lines reported declines from last year. Although one less workday was a factor in the loss of ridership, Metra believes that the switching of monthly ticket passengers to 10-ride tickets also contributed to these declines. The negative results for August resulted in Metra's moving 12 month average growth rate falling to 1.4% from 2.1% in July.

All Pace carriers reported losses with the exception of Paratransit (up 3.1%) and Niles (up 0.1%). However, the Niles results must be considered in light of the fact that the system is free to the public.

Pace attributes the severity of August's results to tightened transfer restrictions, the fare increase, and the difference in work days. On a moving annual basis Pace ridership is now 1.8% below the prior period.

SECTION III
PERFORMANCE INDICATORS

Chicago Transit Authority

CTA's performance through August represents a substantial improvement from last year. The system revenue to cost ratio of 52.9% is 6.7% over last year's performance of 49.6%. Motor bus increased from 54.42% to 56.85% and rapid transit increased from 41.17% to 46.38%. These figures show the effects of moderate expense increases and substantially higher revenues from the fare increase. Through eight months the operating expense per revenue mile has increased a moderate 1.3%. However, this figure has been increasing in recent months due primarily to the Phase I implementation of Operation BUS.

Operating expenses were up 5.5% in August but increased only 1.6% through eight months compared to year ago levels. The primary component of this increase is labor costs which are up 1.5% through eight months due to increased labor hours attributable to additional maintenance and administrative positions. However, operating hours have decreased due to the use of part-time operators and the contracting out of paratransit service. Partially offsetting the higher hours was a lower labor rate. The average loaded rate per hour (includes fringe benefits) through August of \$19.48/hour compares favorably to last year's rate of \$19.53/hour. This lower rate is due to part-time operators and lower estimated paid absences.

Fuel costs are under last year's eight month total by 34.3% due primarily to lower fuel prices. The average fuel price through August was 47.2¢/gallon or 27.5¢/gallon lower than last year's price of 74.7¢/gallon. Electric Power costs are 10.1% higher due primarily to the rate increase granted to Commonwealth Edison but also in part to increased vehicle miles.

Materials expense is down 9.2% from last year through eight months. This is the result of high expenditures in 1985 in several problem areas including the replacement to rapid transit gear cases and bus transmissions. All Other Expenses are up 18.6% from last year due to increased contracting out. The two main components here are the contracting out of paratransit and the contract for farebox maintenance.

Operating revenues are up a significant 8.4% from a year ago. Passenger revenues increased 10.0% reflecting the February fare increase. However, the resultant ridership loss is borne out in particular by the expense per passenger indicator, which has increased 7.8% despite an expense increase of only 1.6% from last year. Non-passenger revenues have decreased through eight months by 18.9%. This reflects the fact that no Local Government funding has been received yet.

Service productivity, as indicated by revenue hours per operator pay hour and revenue miles per mechanic work hour, showed mixed results compared to last year. The 6.6% decline in revenue miles per maintenance pay hour can be attributed to the servicers and repairers added to combat the graffiti problem and to improve vehicle reliability. The 0.7% increase in revenue miles per operator pay hour is attributable to the use of part-time operators.

Service effectiveness through August shows a decline from last year. On a system-wide basis, passengers per revenue mile and passengers per revenue hour were down 5.1% and 5.0% respectively. These reductions reflect the fall off in ridership since the fare increase.

THRU AUGUST

Commuter Rail Division

In August both operating revenues and operating expense increased by about 11%. The operating revenue to expense ratio increased .3% while operating expense per revenue mile and per passenger increased 13% and 15% respectively. The major contributing factors were the unbudgeted increase in claims reserve of \$3.0 million and the additional insurance cost of \$.3 million. Year-to-date the recovery ratio is flat with 1985, however operating expense per revenue mile and per passenger increased 3.6% and 4.5% respectively.

Peak period capacity utilization was flat for the month and was up slightly for the year-to-date. Gains posted by BN, CNW, ICG, NS and NIRC were somewhat offset by declines on South Shore due to additional service that has alleviated overcrowding. On-time performance increased over 5% for the month and over 2% on year-to-date as the South Shore has improved dramatically from 1985 performance (attributable in part to the additional service). Service effectiveness was slightly down when compared to 1985 results as ridership growth has not kept pace with expanded service levels.

Among the individual carriers the South Shore continued to show significant increases in financial performance. The CSS recovery ratio gained 20% while operating expense per passenger declined 8%. This primarily reflects 1985's extraordinary expense due to a major accident in the early part of the year.

The BN and NIRC also continued to show improvement in financial performance while ICG and NS posted declining recovery ratios and increasing operating expense per revenue mile and operating expense per passenger. The allocated accrual for claims reserve and higher insurance cost significantly impacted the performance ratios.

Suburban Bus Division

The Suburban Bus Division continues to show improved financial performance thru August, 1986. The year-to-date results show a revenue increase of 12.6% while expenses increased 3.1%. On the expense side, Pace has benefited from lower than expected fuel and insurance costs.

Service effectiveness has experienced significant declines from year earlier levels as passengers per revenue mile and per revenue hour decreased 6.1% and 5.7% respectively. These declines closely mirror ridership results as service levels have remained flat with last year.

Among the individual carrier groups, the Pace carriers continue to show strong financial performance as the combined recovery ratio improved 16.8% while operating expense per revenue mile and per passenger declined 8.5% and 0.9% respectively. The continued strong performance is due to a 9.6% increase in revenues and a 6.2% drop in expenses.

Nortran's recovery ratio has improved 8.7% over 1985 while operating expense per revenue mile decreased 2.0% and operating expense per passenger increased only 1.7%. Revenues increased 5.3% while expenses rose 3.0%. Since service levels are the same as the prior year, the passenger per revenue mile and per revenue hour indicators declined 3.7% and 2.5% respectively due to a 5.1% drop in passengers.

SECTION IV
FINANCIAL POSITION

COMMENTS TO FINANCIAL STATEMENTS
FOR THE PERIOD ENDING AUGUST 31, 1986

Combined Balance Sheet

As of August 31, 1986 cash and investments totaled \$194.055 million versus \$291.102 million at July 31, 1986. This decrease reflects the maturity of the 1985 Series Working Cash Notes in the amount of \$100 million during the month. Current liabilities also decreased as a result of the maturity of the 1985 Series Working Cash Notes.

The increase in the reserve for prior year budget variance reflects additional interest earned on the undistributed balances due to the service divisions. These balances are being held by the RTA pending approval of project's by the RTA Board.

The reserve for local match capital grants was increased by \$2.666 million. This represents 1/12 of the \$32 million budgeted for 1986. A total of \$21.332 million has been reserved through the first eight months of 1986, while only \$2.535 million has been awarded to the service divisions.

General Fund Statement of Revenues and Expenditures

For the month of August revenues were \$8.228 million more than expenditures. On a year-to-date basis revenues exceed expenditures by \$31.274 million. This reflects aggregate year-to-date positive budget variances of approximately \$30 million at the Service Boards.

Combined Statement of Appropriations

As of August 31, 1986 actual sources of funds slightly exceed budget, while actual uses of funds are approximately 5% below projection.

Sales Tax Receipts

As shown in Appendix B, actual sales tax receipts were 1.8% below budget in July (the most recent month for which actual results are available). For the year-to-date, cumulative receipts are .68% above budget.

It should be noted that these figures have been adjusted to reflect the revised estimate adopted by the RTA Board in August.
